

Made-in-Manitoba Climate and Green Plan

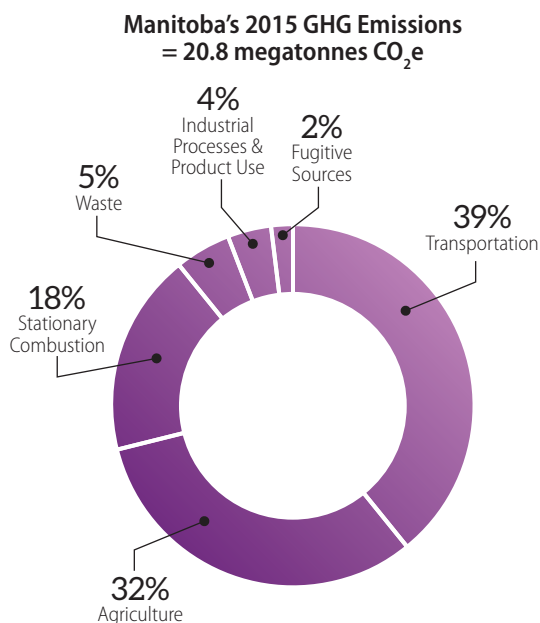

What it Means for Transportation

Transportation Emissions

Transportation helps connect people and businesses to the goods and services they need, thereby playing a vital role in Manitoba's economy and the well-being of its citizens. The transportation sector is Manitoba's largest source of emissions, accounting for 39 per cent of total provincial emissions in 2015.

Low and Level Made-in-Manitoba Carbon Price Saves Money

Our Made-in-Manitoba carbon price will help encourage sustainable transportation, while also keeping costs lower compared to the higher federal carbon tax. In 2022, gasoline and diesel prices will be 5.2 ¢/L and 6.7 ¢/L less expensive, respectively, under the Manitoba plan.

Estimated Fuel price costs and savings, compared to Federal carbon tax

	2018	2019	2020	2021	2022
	Higher Initial Cost		Savings Grow under Made-in-Manitoba Plan		
Gasoline (¢/L)	3.2 ¢/L	1.1 ¢/L	-1.1 ¢/L	-3.2 ¢/L	-5.2 ¢/L
Diesel (¢/L)	3.9 ¢/L	1.3 ¢/L	-1.3 ¢/L	-3.9 ¢/L	-6.7 ¢/L

Sustainable Transportation

The Made-in-Manitoba Climate and Green Plan calls for action to promote sustainable transportation and reduce carbon emissions from the transportation sector.

Biofuels

- Increasing the use of carbon-price exempt biofuels across the province
- Raising the provincial biodiesel mandate from two per cent to five per cent to achieve an additional 100,000 tonnes of CO₂e reductions annually

Next Generation Clean Fuel Technologies

- Exploring options to advance electric vehicle infrastructure and clean fuel technologies.
- Supporting the City of Winnipeg in converting its public transit fleet to electricity

Innovation in the Trucking Sector Heavy Duty Trucking Retrofits

- Helping the trucking sector retrofit existing high mileage, heavy duty vehicles with newer, fuel-efficient technologies that reduce fuel consumption, air pollutants and greenhouse gas emissions.
- Pushing the federal government to improve the accelerated capital cost allowance provisions for more fuel-efficient engines and vehicle replacement.

Investing in Active Transportation

- Providing greater access to active transportation options, such as building more bike paths and lanes in Winnipeg and other communities.
