

# Guidelines for Estimating Wheat Straw Biomass Production Costs 2017

## High Crop Residue Zone in Manitoba

## Guidelines for Estimating Wheat Straw Biomass Production Costs High Crop Residue Zone

Date: January, 2017

The following budgets are estimates of the cost of producing wheat straw biomass in Manitoba. General Manitoba Agriculture recommendations are assumed in using fertilizers and chemical inputs. These figures provide an economic evaluation of wheat straw biomass and estimated prices required to cover all costs. Costs include labour, investment and depreciation, but do not include management costs, nor do they necessarily represent the average cost of production in Manitoba.

These budgets may be adjusted by putting in your own figures. As a producer you are encouraged to calculate your own costs of production for various crops. On each farm, costs and yields differ due to soil type, climate and agronomic practices.

This tool is available as an Excel worksheet at: [www.manitoba.ca/agriculture](http://www.manitoba.ca/agriculture) or at your local [Manitoba Agriculture GO Office](#). [The Farm Machinery Custom and Rental Rate](#) is also available to help determine machinery costs.

\*High Crop Residue generally refers to areas of Manitoba within the Red River Valley where farmers actively manage crop residue with various tillage practices. Producers should use the publication that best corresponds to their farming practices and soil type.

**Note:** This budget is only a guide and is not intended as an in-depth study of the cost of production of this industry. Interpretation and use of this information is the responsibility of the user. If you need help with a budget, contact your local Manitoba Agriculture GO Office.

## Wheat Straw Biomass Cost of Production Summary - January, 2017

*Based on 600 Acres - 60 bu grain yield and 1.52 tons straw per acre  
912 Total tons Straw produced*

A. Operating Costs	<u>\$/acre</u>	<u>\$/ton</u>	<u>Your Cost</u>
1.01 Estimated Net Nutrient Value <sup>1</sup>	-\$1.82	-\$1.20	_____
1.02 Custom Baling <sup>2</sup>	\$38.51	\$25.34	_____
1.03 Custom Field Moving <sup>3</sup>	\$10.13	\$6.66	_____
1.04 Custom Hauling <sup>4</sup>	\$2.73	\$1.80	_____
1.05 Repairs & Maintenance	\$0.40	\$0.26	_____
1.06 Miscellaneous	<u>\$2.50</u>	<u>\$1.64</u>	_____
Sub-total Operating Cost	\$52.45	\$34.50	_____
1.07 Interest on Operating	\$1.18	\$0.78	_____
<b>Total Operating Costs</b>	<b>\$53.63</b>	<b>\$35.28</b>	_____
<b>B. Fixed Costs</b>			
<b>2.0 Depreciation</b>			
2.01 Storage	\$6.67	\$4.39	_____
<b>3.0 Investment</b>			
3.01 Storage	<u>\$0.40</u>	<u>\$0.26</u>	_____
<b>Total Fixed Costs</b>	<b>\$7.07</b>	<b>\$4.65</b>	_____
<b>Total Cost of Production</b>	<b>\$60.70</b>	<b>\$39.93</b>	_____

### Energy Cost Comparison

	<u>Per</u>	
	<u>Million Btu</u>	<u>Per kWh</u>
Wheat Straw @ \$45.92/ton <sup>5</sup>	\$5.15	\$0.0176
Wheat Straw cubes @ \$85.92/ton <sup>6</sup>	\$9.63	\$0.0329
Coal-lignite @ \$120/ton	\$15.20	\$0.0519
Wood Pellets @ \$250/ton	\$24.69	\$0.0843
Oats - grain @ \$3.25/bu	\$20.39	\$0.0696
MB Hydro @ \$0.08861/kWh	\$25.96	\$0.0886
Natural gas high E @ \$0.4900/cu.meter	\$16.22	\$0.0553
Natural gas low E @ \$0.4900/cu.meter	\$19.89	\$0.0679

### Breakeven Biomass Value

	<u>Wheat Straw per Ton</u>
Coal-lignite @ \$120/ton	\$135.66
Wood Pellets @ \$250/ton	\$220.30
Oats - grain @ \$3.25/bu	\$181.97
MB Hydro @ \$0.08861/kWh	\$231.69
Natural gas high E @ \$0.4900/cu.meter	\$144.72
Natural gas low E @ \$0.4900/cu.meter	\$177.52

Breakeven wheat straw \$/ton = \$ per million Btu x 8.9239 million Btu per ton wheat straw.

1. Est. Nutrient Value is based on 12.5lb.N@\$0.39/lb, 4.1lb.P@\$0.44/lb, 14lb.K@\$0.27/lb, 2.5lb.S@\$0.43/lb. per ton of straw minus \$19.45 estimated residue management cost per acre.
2. The cost of custom baling is based on \$11.40 per bale.
3. The cost of custom field moving of bales is based on \$3.00 per bale.
4. The cost of custom hauling is based on \$5.50/mile for 5 miles.
5. Total straw Cost of Production (COP) + 15% producer markup (risk, management and profit margin).
6. Total straw COP + 15% producer markup + \$40.00/ton straw cube production cost.

**Disclaimer:** This budget is only a guide and is not intended as an in depth study of the cost of production of this industry. Interpretation and utilization of this information is the responsibility of the user.

## Wheat Straw Biomass Cost of Production Input Assumptions

### Land

Total Acres 600 acres

### Producer Markup

(Risk, management, and profit margin) 15%

### Nutrient Value (Fertilizer cost)

	<u>\$/lb</u>	<u>Wheat Straw lbs/ton</u>	<u>Straw Nutrient Value</u>
Nitrogen	0.393	12.5	100%
Phosphate	0.443	4.1	100%
Potassium	0.272	28.0	50%
Sulfur	0.425	2.5	100%

### Grain Production

Wheat yield 60.0 bu/ac  
 Straw to Grain Ratio 1.30 S:G  
 Baled/Harvested Straw 65%

### Custom Rates

Heavy harrow - custom rate (\$/acre) \$4.75 \$/acre  
 Average harrow passes per acre 2 passes  
 Deep tillage - custom rate (\$/acre) \$9.10 \$/acre  
 Baling - custom rate (\$/bale) \$11.40 \$/bale  
 Pickup, load, unload and stack - (\$/bale) \$3.00 \$/bale  
 Average round bale weight (lbs) 900 lbs  
 Average bale moisture content 11 %  
 Hauling - custom rate per loaded mile \$5.50 \$/mile  
 Hauling - average miles per load 5 miles  
 Hauling - average bales per load 34 bales

### Repairs & Maintenance

% rate of investment 2%

### Miscellaneous

Miscellaneous Costs \$2.50 \$/acre  
 Straw chopper - diesel fuel \$0.85 \$/acre  
 Wheat straw cube production \$40.00 \$/ton  
 Average coal moisture content 12 %  
 Wood pellet moisture content 5 %  
 Oat grain moisture content 12.5 %

### Interest

Interest on Operating 4.50 %  
 Investment interest rate 2.25 %

### Energy Cost Comparisons

	<u>Cost per unit</u>		<u>Btu per unit</u>		<u>Heat Efficien</u>
Wheat straw - dry basis	\$39.93	ton	7,713	lb.	65%
MB Hydro residential rate	\$0.08861	kWhr	3,413	kWh	100%
Coal - lignite	\$120	ton	6,900	lb.	65%
Wood pellets	\$250	ton	8,200	lb.	65%
Oats (grain - 34 lb. bushel)	\$3.25	bushel	8,242	lb.	65%
Natural gas - high efficiency	\$0.490	m <sup>3</sup>	32,844	m <sup>3</sup>	92%
Natural gas - low efficiency	\$0.490	m <sup>3</sup>	32,844	m <sup>3</sup>	75%

### Capital Costs

<u>Capital Costs</u>	<u>Biomass Cost/Acre</u>	<u>Useful Life</u>	<u>Salvage Value</u>
Storage Investment	\$20	3	0%
	<u>Market Value</u>	<u>% Allocated to Biomass</u>	<u>Allocated Biomass</u>
Storage	\$12,000	100%	\$12,000
<b>Total Capital Investment</b>	<b>\$12,000</b>		<b>\$12,000</b>

## Assumptions

1. Assumed a total of 600 acres of wheat straw biomass.
2. Assumed an average yield of 1.52 tons per acre.
3. Assumed a 15% producer markup per ton of straw.
4. Straw value is based on net nutrient value per acre.
5. Machinery and equipment costs for the wheat straw biomass enterprise are based on custom rates. Storage facilities were valued at \$12,000 in total.
6. The budget is based on a round bale production system with outside storage.

## Wheat Straw Biomass Cost of Production Worksheet
