The annual rent payable under this Lease Agreement shall be calculated as follows:

#### **DEFINITIONS**

- 1** In this Schedule B, the following terms and expressions shall have the following meanings:

**“Animal Unit Month”** or **“A.U.M.”** means the amount of forage required to feed one mature 454 kg (1,000 pound) cow, with or without calf at foot, for one month while maintaining the vegetative stand on all of the Leased Lands in good condition;

**“Leased Lands”** means the parcel or parcels of land, as identified in Schedule A to this Lease Agreement.

**CALCULATING  
TOTAL ANNUAL  
RENT**

- 2 The annual rent payable for the Leased Lands shall be determined using the following formula:

$$\text{rent} = A \times B \times 3.5\%$$

In this formula,

- A is the average price of beef, determined by the average sale price per hundred pound weight for the previous 36 months, ending September 30 for 500 to 600 pound heifers and steers in the province as published by Canfax (an operating division of the Canadian Cattlemen's Association);
- B is the Forage Production Capacity of the Leased Lands.
