

Forage Ammoniation Workshop

Join Manitoba Agriculture for an in-field demonstration on how to properly ammoniate low quality forages to improve your winter feed supplies.

Date: Wednesday, Oct. 9, 2024

Time: 1:30 p.m – 3:30 p.m.

Place: Manitoba Beef & Forage Initiatives - Brookdale
Half mile east of highway #353 and #10 intersection
north of Brandon

Agenda

- 1:30 p.m. **Safe handling of anhydrous ammonia.**
Greg Dunn, Heritage Co-op, Minnedosa
- 2:00 p.m. **Economics and options for alternative feeds.**
Ben Hamm, Farm Management Specialist, Manitoba Agriculture
- 2:30 p.m. **Pros and cons of ammoniating forages. How much will the feed value improve on straw, wild hay, and other low quality forages?**
Shawn Cabak, Forage & Livestock Specialist, Manitoba Agriculture
- 3:00 p.m. **From 0-82 all you need to know on how to set up to ammoniate - stacking, covering and injecting.**
Shawn Cabak, Forage & Livestock Specialist, Manitoba Agriculture & Greg Dunn, Heritage Co-op, Minnedosa
