

Climate and Green Plan Town Hall Toolkit

Strategic Framework
Overview

The Strategic Framework

Foundations

Knowledge and Foresight Through science and applied research, providing communities with the information and tools they need to plan and adapt.

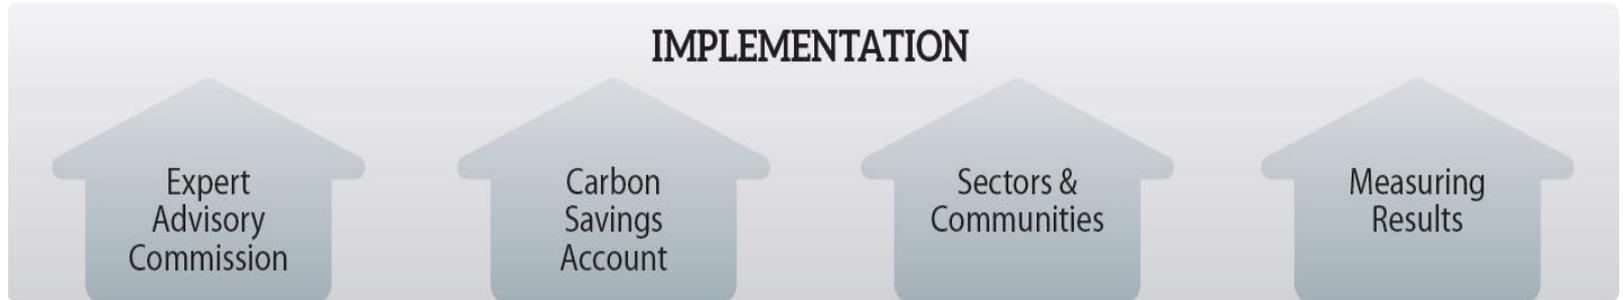

Education and Awareness Helping Manitobans make informed decisions through education and awareness building.

Planning and Adaptations Creating new planning tools to assist communities in making smart, sustainable planning decisions to aid in adaptation

Local and Indigenous Knowledge Bringing traditional knowledge to the forefront of sustainability issues.

Implementation

Expert Advisory Commission

Creating an expert advisory commission with an independent mandate to aid in the implementation of Manitoba's Climate and Green Plan.

Carbon Savings Accounts

A series of short, five-year accounts that will bend the carbon curve down in a transparent, meaningful way.

Sectors & Communities

Working collaboratively with key economic sectors and communities to deliver on Manitoba's Climate and Green Plan.

Measuring Results

Establishing indicators to measure, report, and verify our progress.
