Average Timelines

Notes:

This infographic presents registration data on internationally educated applicants to Manitoba regulated professions from 2016-2025. Each applicant is counted once, regardless of the number of applications made.

In more than half of Manitoba regulated professions, applicants apply first to a national third party for assessment. These individuals are not included in the Fair Registration Practices Office's dataset until they are successful with this part of the process and make an application to a Manitoba regulator. This means applicants are under-counted across the period.

Complete timeline information is unavailable for some applicants who registered. Timelines presented above are for 3,906/5,205 applicants who provisionally registered in the period and for 3,598/4,023 who registered in the period.
