

# NEW: Leaders in Training Program Data Science Stream

**Have you considered a career in the public service?** The Government of Manitoba is launching a new Data Science stream of the Leaders in Training Program (LTP). The Data Science LTP is an 18 month paid internship for data scientists and data professionals interested in pursuing a career in the public service.

---

**Push the boundary of data use in the public service.** We are seeking curious minds, innovative thinkers and meticulous lovers of data to join us in pushing the boundary of data use and innovation in the public service.

Interns will work on exciting data projects that span multiple domains and datasets to support the development of evidence-informed policies and decisions that shape services for Manitobans.

**Many varied opportunities with one employer.** This program offers professional experience and training at the intersection of data science and policy, allowing you to put your data skills to use to positively impact the lives of Manitobans. Skills and knowledge will be developed and enhanced through three challenging work placements, under the guidance and mentorship of senior leaders and data professionals in the organization

**Work in an environment that embraces diversity.** We benefit from a diverse public service with vast knowledge, experience and insights. Be part of our work to serving the public with integrity, respect and inclusiveness.

**Network with leaders.** Work closely with senior public service leaders and data professionals for mentorship and to help expand your professional network.

**Have an impact.** Use your data science skills and knowledge to inform policies that benefit all Manitobans.
