

AGGREGATE RESOURCES OF THE FLIN FLON - CRANBERRY PORTAGE AREA

LEGEND

QUATERNARY

GLACIOLACUSTRINE (BEACHES)

3b) - sand and gravel, usually > 2m thick.

3a) - sand, or untested.

GLACIOFLUVIAL (OUTWASH AND ESKERS)

2b) - sand and gravel, usually > 4m thick.

2a) - sand, high potential for gravel at depth; or untested.

GLACIAL (LEE-SIDE)

1b) - sand and gravel predominates but deposit also includes till and fine material.

1a) - sand predominates but deposit may also include gravel, till and fine material.

SYMBOLS

- Geologic contact
- Beach
- Gravel pit, intermittent use
- Gravel pit, abandoned, commonly revegetated, usually depleted
- Bedrock quarry
- Striae
- 45123** Deposit number
- Exposure site number, HG prefix in text
- Backhoe site number, HB prefix in text
- Till sample site, TP prefix in text
- Sampled site, designated by suffix S following site number
- Park boundary
- Township boundary

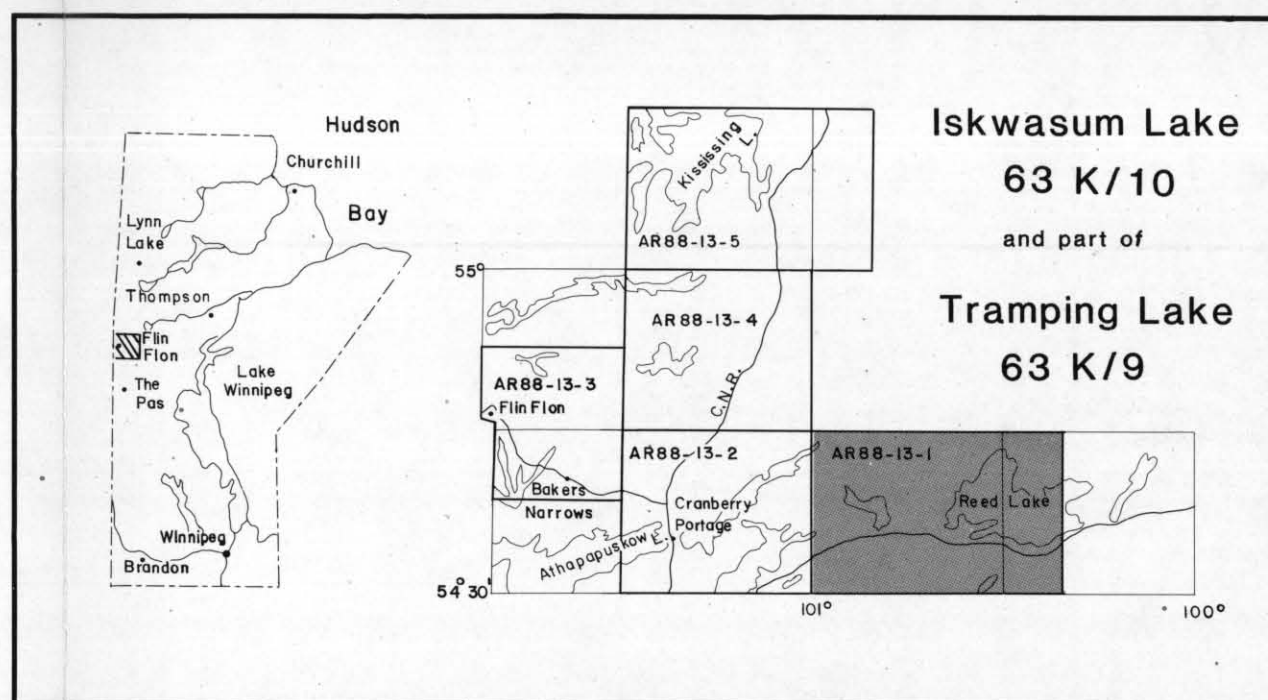

Preliminary survey, mapping restricted to road access.
