## Manitoba Population Estimates: January 1, 2023 (Released March 22, 2023)

Statistics Canada has released its January 1, 2023 population estimates and fourth quarter 2022 demographic estimates for Canada, the provinces and territories.

According to Statistics Canada, Manitoba's total population was estimated at 1,431,792 residents as of January 1, 2023, up 11,564 individuals from the October 1, 2022 estimate. Population growth continues on a twelve-month basis, with Manitoba's increase since January 1, 2022 estimated at 33,489 people, or 2.39%. Although Manitoba's twelve-month immigration and other international levels are modern-day records, net interprovincial outflows not seen since 1989 hamper growth.

	January 1, 2023	October 1, 2022	January 1, 2022
<b>Population</b>	1,431,792	up 11,564	up 33,489
<b>Net Migration (January to December)</b>		<b>2022</b>	<b>2021</b>
<b>International</b>		20,380	15,346
<b>Other International*</b>		20,213	2,539
<b>Interprovincial</b>		-10,132	-7,118
<b>Total</b>		30,461	10,767

*\*Note: Other International is Net Non-permanent Residents, plus Returning Emigrants, less Net Temporary Emigrants.*

Net international migration for 2022 was 20,380 individuals, up from 15,346 people in 2021. Other international migration (that is, the net change in the number of Canadian citizens returning from abroad, non-permanent residents and Canadians temporarily abroad) was an estimated net gain of 20,213 migrants for 2022. This net gain is eight times larger than the net gain of 2,539 other international migrants estimated for 2021.

Through interprovincial migration, Manitoba recorded an estimated net loss to other provinces and territories of 10,132 residents during 2022. This net loss is larger than the net loss of 7,118 individuals in 2021. During 2022, Manitoba's largest net gains were from Northwest Territories (68) and Yukon (20). The largest net losses were to Alberta (-4,953), British Columbia (-2,882) and Ontario (-1,151).

Generally, Manitoba's interprovincial migration losses are offset to some degree by other forms of migration. Combining the various forms of population movement, Manitoba recorded an overall net migration gain of 30,461 people in 2022. This net gain marked an increase of 19,694 individuals from the net gain of 10,767 migrants in 2021.

## **Notes to Users**

### **Regarding COVID-19**

On March 18, 2020 the Government of Canada implemented travel restrictions aimed at reducing the spread of COVID-19. In order to try and account for the restrictions imposed by Canada, and other countries, Statistics Canada adjusted their usual estimation methods for Emigrants, Returning Emigrants and Net Temporary Emigrants. Beginning in 2021, as COVID-19 related travel restrictions started to lift, Statistics Canada modified their methodology adjustments to reflect a return towards pre-pandemic migration levels.

From the first quarter 2022 onward, Statistics Canada has returned to their usual estimation methods for Emigrants, Returning Emigrants and Net Temporary Emigrants. However, slight modifications are being made to ensure that pandemic effects are not carried forward into future estimates. No other COVID-19 related adjustments are being made at this time.

### **Birth Registration Delays**

Birth estimation methods for Manitoba and Nova Scotia have been adjusted due to data availability issues for the 2021 calendar year.

### **Canada-Ukraine Authorization for Emergency Travel (CUAET)**

Since March 17, 2022, persons with a Canada-Ukraine authorization for emergency travel who are on Canadian soil are included in the Net Non-permanent Resident estimates.
