

7.0M Roadside Design

The TAC Chapter **7.0** is not applicable to the Department's highways as written.

The Department does not use TAC's Chapter 7. Instead, the Department has developed its own "Roadside Design Guide" to better address specific Manitoba requirements and standards.

The "Department's Roadside Design Guide" applies in full, with the exception of the geometric design guide supplement 7.4.1.1M, which specifically addresses roadside slopes.
