

**Licence No. 2330**

**Licence Issued: May 27, 1998**

**IN ACCORDANCE WITH THE MANITOBA ENVIRONMENT ACT (C.C.S.M. c. E125)  
THIS LICENCE IS ISSUED PURSUANT TO SECTION 10(1) TO:**

**FRANK FAIR INDUSTRIES LTD.; "the Licencee"**

for the operation of the Development being a manufacturing facility of fiberglass and thermoplastic products, located at 350 and 400 Archibald Street, as described in Attachment 'A', in The City of Winnipeg, in accordance with the Proposal submitted on March 25, 1998, and subject to the following specifications, limits, terms and conditions:

**DEFINITIONS**

In this Licence,

**"accredited laboratory"** means facilities accredited by the Standard Council of Canada (SCC), or facilities accredited by another accrediting agency recognized by Manitoba Environment to be equivalent to the SCC, or facilities which can demonstrate to Manitoba Environment, upon request, that quality assurance/quality control (QA/QC) procedures are in place equivalent to accreditation based on the Canadian Standard Can/CSA-Z753, extension of the international standard ISO 9000, Guide 25;

**"affected area"** means a geographical area, excluding the property of the Development;

**"Director"** means an employee so designated pursuant to The Environment Act;

**"noise nuisance"** means an unwanted sound, in an affected area, which is annoying, troublesome, or disagreeable to a person:

- a. residing in an affected area;
- b. working in an affected area; or
- c. present at a location in an affected area which is normally open to the members of the public;

if the unwanted sound

- d. is the subject of at least 5 written complaints, received by the Director in a form satisfactory to the Director, and within a 90 day period, from 5 different persons falling within clauses a), b), or c), who do not live in the same household;

**"odour nuisance"** means a continuous or repeated odour, smell or aroma, in an affected area, which is offensive, obnoxious, troublesome, annoying, unpleasant, or disagreeable to a person:

- a. residing in an affected area;
- b. working in an affected area; or
- c. present at a location in an affected area which is normally open to the members of the public;

if the odour, smell or aroma

- d. is the subject of at least 5 written complaints, received by the Director in a form satisfactory to the Director, and within a 90 day period, from 5 different persons falling within clauses a), b), or c), who do not live in the same household;

**"opacity"** means the degree to which emissions reduce the transmission of light and obscure the view of an object in the background;

**"particulate matter"** means any finely divided liquid or solid matter other than water droplets;

**"particulate residue"** means that part or portion of an atmospheric emission which is deposited onto a surface;

**"point source"** means any point of emission from the Development where pollutants are emitted to the atmosphere by means of a stack; and

**"stack"** means a duct, pipe, chimney, vent, opening or other structure through which pollutants are emitted to the atmosphere.

### **GENERAL TERMS AND CONDITIONS**

This Section of the Licence contains requirements intended to provide guidance to the Licencee in implementing practices to ensure that the environment is maintained in such a manner as to sustain a high quality of life, including social and economic development, recreation and leisure for present and future Manitobans.

1. The Licencee shall implement a high standard of equipment maintenance and good housekeeping and operational practices with respect to the Development, at all times.
2. The Licencee shall reduce the production and dissemination of wastes by initiating and maintaining waste reduction and waste recycling programs.
3. The Licencee shall, upon the request of the Director and in addition to any of the limits, terms or conditions specified in this Licence:
  - a. sample, monitor, analyze and/or investigate specific areas of concern regarding any segment, component or aspect of pollutant storage, containment, treatment, handling, disposal or emission systems, for such pollutants or ambient quality, aquatic toxicity, leachate characteristics and discharge or emission rates, for such duration and at such frequencies as may be specified;
  - b. determine the environmental impact associated with the release of any pollutants from the said Development; or
  - c. provide the Director, within such time as may be specified, with such reports, drawings, specifications, analytical data, descriptions of sampling and analytical procedures being used, bioassay data, flow rate measurements and such other information as may from time to time be requested.
4. The Licencee shall, unless otherwise specified in this Licence:
  - a. carry out all sampling of, and preservation and analyses on, water, soil or air samples in accordance with methodologies approved by the Director;
  - b. ensure that all analytical determinations are undertaken by an accredited laboratory; and
  - c. report the results to the Director within 60 days of the samples being taken.
5. The Licencee shall provide to the Director, upon request, all information required under this Licence, in writing and in such form and content (including number of copies), as may be specified by the Director.

### **LIMITS, TERMS AND CONDITIONS**

6. The Licencee shall operate the Development in accordance with the applicable provisions of the Canadian Council of Ministers of Environment (CCME – PN 1276) Management Plan Initiative V305, *Environmental Guideline For the Reduction of Volatile Organic Compound Emissions from the Composites Industry*, published January 1998.

### **Respecting Air Emissions**

7. The Licencee shall not emit from the Development:

a. particulate matter in any air emission that:

- i. exceeds 0.23 grams per dry standard cubic metre calculated at 25 degrees Celsius and 760 millimetres of mercury, corrected to 12 percent carbon dioxide for processes involving combustion, from any point source of the Development;
- ii. exhibits a visible plume with an opacity of greater than 5 percent at any point beyond the property line of the Development; or
- iii. results in the deposition of visible particulate residue at any time beyond the property line of the Development; or

b. particulate matter from any point source with an opacity that equals or exceeds:

- i. 20 percent as the average of any 24 consecutive opacity observations taken at 15 second intervals;
- ii. 20 percent for more than 16 individual opacity observations within any 1 hour period; or
- iii. 40 percent for any individual opacity observation.

8. The Licencee shall not cause or permit a noise nuisance to be created as a result of the operation or alteration of the Development, and shall take such steps as the Director may require to eliminate or mitigate a noise nuisance.

9. The Licencee shall not cause or permit an odour nuisance to be created as a result of the operation or alteration of the Development, and shall take such steps as the Director may require to eliminate or mitigate an odour nuisance.

**Respecting Air Pollution Control Management**

10. The Licencee shall, upon the request of the Director, submit a plan for the further management of particulate and organic air emissions including total VOC's, styrene, acetone, ethylene-vinylacetate copolymer, methyl methacrylate, isopropanol, methyl ethyl ketone, dimethyl phthalate, hydroquinone, xylene, benzene, ethyl benzene, toluene and others as indicated by the Director. The plan shall identify the potential impacts of emissions and describe practicable measures to reduce, minimize or remove contaminants either through operational procedures or by pollution control devices such that any potential significant health or environmental impact beyond the property boundaries of the Development are minimized.

11. The Licencee shall, when requested by the Director, implement any measure or measures contained in the management plan developed in Clause 10 of this Licence, according to a schedule and timeframe agreed to between the Licencee and the Director.

**Respecting Air Emission Sampling and Analysis**

12. The Licencee shall, at the written request of the Director, construct a stack or stacks for the sampling of emissions at the Development which are:

- a. at a location(s);
- b. completed within a time frame; and
- c. to the specifications;

stipulated by the Director.

13. The Licencee shall, at the written request of and in a manner satisfactory to the Director, install stack-sampling facilities at any or all stack or stacks discharging from any process at the Development.

14. The Licencee shall submit, within 60 days of the Director's written request, a proposal which is acceptable to the

Director for the characterization, sampling and analysis of emissions from any process at the Development.

15. The Licencee shall complete the sampling of emissions requested in Clause 14 of this Licence in accordance with the approved proposal.
16. The Licencee shall submit to the Director within 90 days of receipt of the analytical results of the sampling performed per Clause 15 of this Licence, a report that discusses the characterization, sampling and analysis project and the results of that project. This report shall address any potential health or environmental impacts beyond the boundaries of the Development that might be caused by the emissions studied.

### **Respecting Waste Disposal**

17. The Licencee shall dispose of all solid and liquid waste generated from any activity at the Development in a manner acceptable to the Director.

### **Respecting Emergency Planning**

18. The Licencee shall submit to the Director for approval, within 30 days of the date of this Licence, a contingency plan, in accordance with National Standard of Canada CAN/CSA-Z731-95 Emergency Planning for Industry, outlining procedures to be used in the event of a leak, spill, fire, or other hazardous condition at the Development.

### **REVIEW AND REVOCATION**

- A. If, in the opinion of the Director, the Licencee has exceeded or is exceeding or has or is failing to meet the specifications, limits, terms, or conditions set out in this Licence, the Director may, temporarily or permanently, revoke this Licence.
- B. If, in the opinion of the Director, new evidence warrants a change in the specifications, limits, terms or conditions of this Licence, the Director may require the filing of a new proposal pursuant to Section 10 of The Environment Act.
