

AN ORDER OF THE CLEAN ENVIRONMENT COMMISSION  
UNDER THE CLEAN ENVIRONMENT ACT

---

RE: THE CLEAN ENVIRONMENT COMMISSION and MANITOBA ROLLING MILLS (CANADA) LIMITED -  
LAMINOIRS DU MANITOBA (CANADA) LIMITEE, Applicant,

WHEREAS pursuant to the provisions of The Clean Environment Act, MANITOBA ROLLING MILLS (CANADA) LIMITED - LAMINOIRS DU MANITOBA (CANADA) LIMITEE filed a proposal with the Department of Mines, Resources and Environmental Management in connection with the operation of a rolling mill discharging wastewater effluent via an open ditch to the Red River, the said mill being located on River Lot 22 in the Parish of St. Clements, in The Rural Municipality of St. Andrews, Manitoba;

AND WHEREAS in the absence of limits being prescribed by a Regulation under the said Act, the said proposal was referred to The Clean Environment Commission for the prescribing of limits;

AND WHEREAS no representation was made to the Commission by any person who is or who is likely to be affected by an Order of the Commission prescribing limits in connection with the said operation;

AND WHEREAS the Commission considered the said proposal on the 13th day of March, 1978;

IT IS HEREBY ORDERED THAT

1. The Applicant shall ensure that the concentration of non-filtrable residue in the wastewater effluent being discharged to the Red River in the said open ditch, as determined from the analysis of a composite sample\*, is not in excess of 30 milligrams per litre of sample.
2. The Applicant shall, on or before the 1st day of April, 1979, submit to the Environmental Management Division of the Department of Mines, Resources and Environmental Management a plan for the installation of facilities and the adoption of procedures at the earliest practical date to ensure that the non-filtrable residue content of the said effluent, as determined from the analysis of a grab sample, is not in excess of 50 milligrams per litre of sample.

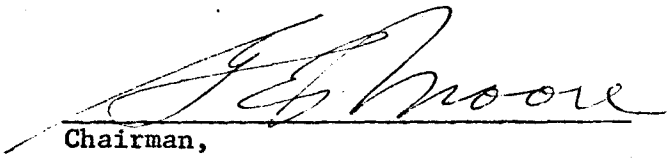

*Assigned  
to W.P.C.  
March 28, 1978*

3. The Applicant shall ensure that a composite sample\* of the said effluent is collected weekly and analyzed for non-filtrable residue.
4. The Applicant shall ensure that the total dry weather effluent flow discharged to the Red River via the main outfall is recorded daily, and that in the case that the said flow is determined by estimation, the estimation is carried out to the satisfaction of the said Division.
5. The Applicant shall ensure that the data collected pursuant to Clauses 2 and 3 of this Order are forwarded monthly to the said Division, on a form satisfactory to the said Division, and within 30 days of the end of the month during which the data are collected.

Order No. 782

Dated at the City of Winnipeg

this 17th day of March, 1978

  
Chairman,  
The Clean Environment Commission.

C-b-136.1

\* A composite sample is a sample composed of a minimum of four equal volumes of effluent taken over approximately equal time intervals for a minimum time period of four hours in any day.
