

Lignes directrices pour les unités d'éducation permanente Évaluation et obtention

Le [Règlement sur les exploitants d'installations de traitement des eaux du Manitoba](#) exige que ces exploitants obtiennent des unités d'éducation permanente aux fins de renouvellement du certificat. Le Règlement permet également aux exploitants d'obtenir de telles unités aux fins de formation ou de l'obtention d'une équivalence à l'égard des études pour les mises à niveau de l'accréditation.

Les exploitants et les employeurs doivent faire le suivi de l'obtention des unités d'éducation permanente et fournir des copies des dossiers d'obtention avec les demandes de renouvellement ou de mise à niveau.

Renouvellement

Voici les unités d'éducation permanente requises pour renouveler un certificat d'exploitant tous les cinq ans :

- 3,0 unités d'éducation permanente pour le certificat de petits réseaux (ou 0,6 unité d'éducation permanente par année);
- 6,0 unités d'éducation permanente pour le certificat de classe 1 à 4 (ou 1,2 unité d'éducation permanente par année).

Au moins les trois quarts (75 %) des unités d'éducation permanente obtenues doivent porter sur les matières de base communes à toutes les catégories de certificats d'exploitant (p. ex., cours sur le traitement des eaux). Le dernier quart (25 %) des unités d'éducation permanente peuvent porter sur des matières facultatives (p. ex., sécurité, gestion, informatique, etc.). Si un cours sur la sécurité ou les premiers soins est suivi plus d'une fois durant la période de renouvellement, il ne peut être comptabilisé qu'une seule fois pour le renouvellement.

Équivalences

Les exploitants peuvent aussi obtenir des unités d'éducation permanente pour des équivalences à l'égard :

- de l'expérience d'exploitation (classe 2 à 4);
- de l'expérience d'un poste comportant des responsabilités (classes 3 et 4);
- des études postsecondaires (classes 3 et 4).

Il est possible d'obtenir des unités d'éducation permanente pour une partie de l'expérience d'exploitation et d'un poste comportant des responsabilités, conformément au [tableau 2 de l'annexe B](#) du Règlement.

(suite)

Il est aussi possible d'obtenir des unités d'éducation permanente pour des études secondaires et des études postsecondaires pertinentes pour les certificats de classe 3 et de classe 4. Le Règlement permet aussi d'obtenir des unités d'éducation permanente en remplacement d'études postsecondaires ou de l'expérience d'un poste comportant des responsabilités, jusqu'à un maximum de 50 % de l'exigence. Par exemple, pour l'exigence de deux ans d'études postsecondaires pertinentes, une personne peut remplacer une année d'études postsecondaires par une année d'expérience d'un poste comportant des responsabilités dans une installation de classe 2 ou supérieure.

- 45 unités d'éducation permanente = une année d'études secondaires ou postsecondaires
- Une année d'études postsecondaires = une année d'expérience d'un poste comportant des responsabilités

Évaluation des cours aux fins d'obtention d'unités d'éducation permanente

Environnement et Changement climatique Manitoba examine les formations, les ateliers ou les cours sur demande pour déterminer s'ils sont admissibles à l'obtention d'unités d'éducation permanente. Il pourra aussi consulter le Comité consultatif d'accréditation.

Les activités suivantes ne sont pas admissibles à l'obtention d'unités d'éducation permanente : réunions du personnel liées au travail, visites guidées, foires commerciales (sans autre activité), démonstrations de produits.

Les activités donnant droit à l'obtention d'unités d'éducation permanente comprennent les cours en classe, les séminaires, les ateliers, les conférences, la formation interne offerte par un fournisseur de services publics, les cours par correspondance et les cours en ligne. Les unités d'éducation permanente accordées pour les cours par correspondance ou en ligne seront établies en évaluant le temps qu'il faudrait pour donner le cours dans une salle de classe et non le temps réel qu'il faut pour terminer le cours. Les cours d'une durée de moins de trois heures ne sont généralement pas admissibles à l'obtention d'unités d'éducation permanente.

Le Règlement prévoit ce qui suit :

Interprétation : « unité d'éducation permanente »

1.1(1) Pour l'application du présent règlement, quiconque termine 10 heures-contact obtient une unité d'éducation permanente.

1.1(2) Dans le paragraphe (1), « **heure-contact** » s'entend d'une heure de communication et d'échange entre un instructeur et un apprenant qui a lieu dans le cadre d'une activité structurée d'éducation permanente que reconnaît le directeur.

(suite)

***** Voici une liste partielle des unités reconnues par le programme d'accréditation. *****

Rendez-vous régulièrement sur les sites Web des fournisseurs de cours pour déterminer si ces cours ou d'autres sont offerts.

Si vous avez suivi une formation qui ne figure pas dans la liste ci-dessous et que vous croyez qu'elle est pertinente, vous pouvez demander à soumettre un plan ou une description de cours aux fins d'examen au Programme d'accréditation en écrivant à wwopcert@gov.mb.ca.

***** La liste sera mise à jour régulièrement à mesure que de nouveaux cours seront soumis pour examen. *****

Liste des métiers connexes

Voici la liste des métiers au Manitoba qui sont admissibles à l'obtention d'unités aux fins du programme d'accréditation des exploitants d'installations de traitement des eaux du Manitoba. La réussite de la formation théorique ou en classe d'un métier connexe est admissible à l'obtention d'unités. Le pourcentage indiqué ci-dessous correspond au pourcentage de temps en classe qui sera admissible à l'obtention d'unités.

Ce formulaire ou cette publication sont également disponibles en d'autres formats, sur demande.

***** The list will be updated regularly as new courses are submitted for review *****

Intro to Pressure: Hazards and Best Practices	0.3
Responsibilities Under the Statutory Standard of Care	0.3
Operation of Small Drinking Water Systems	1.8

Western Canada Water (WCW)

formerly Western Canada Water and Wastewater Association (WCWWA)

<http://www.wcwwa.ca/>

Course Name	CEU
Assessing and Addressing Challenging Hydraulic	0.4

Western Canada Water (WCW) (Cont'd)

Course Name	CEU
Asset Management Workshop: The Economics of a “Hot Spot” Upgrade Strategy for Water Mains	0.3
Biosolids	0.3
Biosolids and Residuals	0.5
Biosolids Management; Understanding Requirements and Options	0.3
CCC Conference	0.6
Chemical Feed Pump Systems	0.3
Contract law for Engineers	0.3
Conventional Water Treatment	0.3
Cross Connection Control Through Awareness and Backflow Prevention	0.3
Dealing with Customer Complaints	0.3
Disinfection By-product Seminar	0.6
Disinfection of Pipelines and Storage Facilities	0.3
Drinking Water Safety Plan Information Session	0.3
Emergency Response Planning	1.5
Green Building: Clear Savings Potential	0.3
Greenhouse Gases and Carbon Footprinting in the Water/Wastewater Industry	0.4
Leadership Concerns Workshop	0.3
Leadership in Project Management	0.3
Mathematics (correspondence)	9.0
Membrane Optimization	0.3
Membrane Technologies for Water and Wastewater Treatment	0.6
Membrane Technologies for Water Treatment	0.5
Membrane Theory and Maintenance Workshop	0.6
Municipal Wastewater: Basics, Treatment, Regulations and Case Studies	0.6
Municipal Water Reuse - Challenges and Opportunities	0.7
On-Site Hypochlorite Generation as a Chemical Disinfection Alternative	0.6
Problem Solving Water & Wastewater Infrastructure	0.5
Project Management	0.3
Project Planning, Delivery & Commissioning Seminar	1.2
Pumps & Force mains	0.3
Pump Operations & Maintenance	0.4
Public Consultation Process	0.3
Regional Water Systems - Design and Operation Basics	0.3
Reservoir Water Quality Management	0.3
River Health	0.3
SCADA Fundamentals	0.3
Sewage Lagoon Treatment	0.5
Source Control Strategies That Work	0.3
Source Water Protection	0.3
Surface Water Treatment Workshop	0.7
Tertiary Filtration Workshop	0.3

Western Canada Water (WCW) (Cont'd)

Course Name	CEU
The Future Art of Stormwater	0.5
Utility Asset Management	0.3
Utility Management Workshop - A Holistic Approach to Your Utility	0.7
Vulnerability Assessment Workshop	0.7
Wastewater Pumping Station and Force main Systems Design, Operation and Maintenance Workshop	1.2
Water Conservation Guidelines - Water Audits, Loss Control and Non-revenue Water Loss	0.3
Water Main Relining	0.3
Water Management	0.3
Water Reuse in Western Canada - Drivers, Technologies and Examples	0.3
Watershed and Stormwater Management	0.3
Water Treatment Plant Operation correspondence course	15.0
Water Treatment Disinfection Workshop	0.7
Web Workshop on Pumps Operations and Maintenance	0.4
Where has all our Water Gone	0.4
Where has all our Water Gone? Part 2	0.3
Your Lead Sampling Program	0.3

Western Canada Water Environment Association (WCWEA)

<http://www.wcwea.org/>

Course Name	CEU
Nutrient Removal Seminar 2005	1.3

YOW Canada

<http://www.yowcanada.com/>

Course Name	CEU
TDG for All Workers (online course)	0.3

Others

Course Name	CEU
City of Brandon Respiratory Protection Training	0.3
Confined Space Entry	0.6
Fall Protection	0.3
Lift Truck Operator	0.3

List of Related Trades

The following is a list of trades in Manitoba that are eligible for CEU credit for the purposes of the Manitoba Water and Wastewater Facility Operators Certification Program. Completion of the theory or in-school portion of a related trade is eligible for CEU credit. The percentage listed below is the percentage of classroom time that will be eligible for credit.

Manitoba Trade Name	Percentage of theory accepted for CEU credit
Plumber	100%
Electrician	100%
Water, Fuels and Environment Technician DP3A #0023	100% (90 CEUs)
