Attention: **Mr. James Capotosto, Director - Environmental Approvals Branch**

Re: **Notice of Alteration for Dangerous Goods Handling and Transportation Act Licence No. 334 HW for the Removal of a Ringwood Environmental Inc. Model CE-400 WWTP, File No.: 4320.10**

Dear Mr. Capotosto:

GFL Environmental Inc. is submitting a Notice of Alteration (NoA) for an alteration to the Development located at 1090 Kenaston, Winnipeg, MB, which is licensed under the *Dangerous Goods Handling and Transportation Act* Licence No. 334HW. GFL is planning to remove the Ringwood Environmental Inc. Model CE-400 Wastewater Treatment Plant (WWTP) from Building "B", as it is no longer required at the Facility. The intent of the NoA submission is to ensure that Manitoba Environment, Climate and Parks, are updated as to the status of processes and associated infrastructure at the facility.

While there are not clauses in the permit directly referencing the WWTP, Clause 88 allows the Facility to treat wastewater at the Site or send for disposal to a licensed wastewater treatment facility. GFL currently diverts all wastewater to disposal as the WWTP has become unreliable in recent years, hence the decision to remove it from the Facility. There are no additional environmental effects created by the removal of the WWTP. Given the insignificant environmental effects, this alteration would be considered minor.

In fulfillment of MECP's requirements, please find enclosed with this cover letter, and a completed Notice of Alteration (NoA) Form.

Additionally, MECP has the ability to waive the \$500 application fee if the alteration does not involve significant environmental effects. As noted within the NoA, the removal of the WWTP does not create significant environmental effects, and GFL respectfully requests that the NoA application fee be waived.

Should you have any questions, please do not hesitate to contact the undersigned at (780) 805 6107.

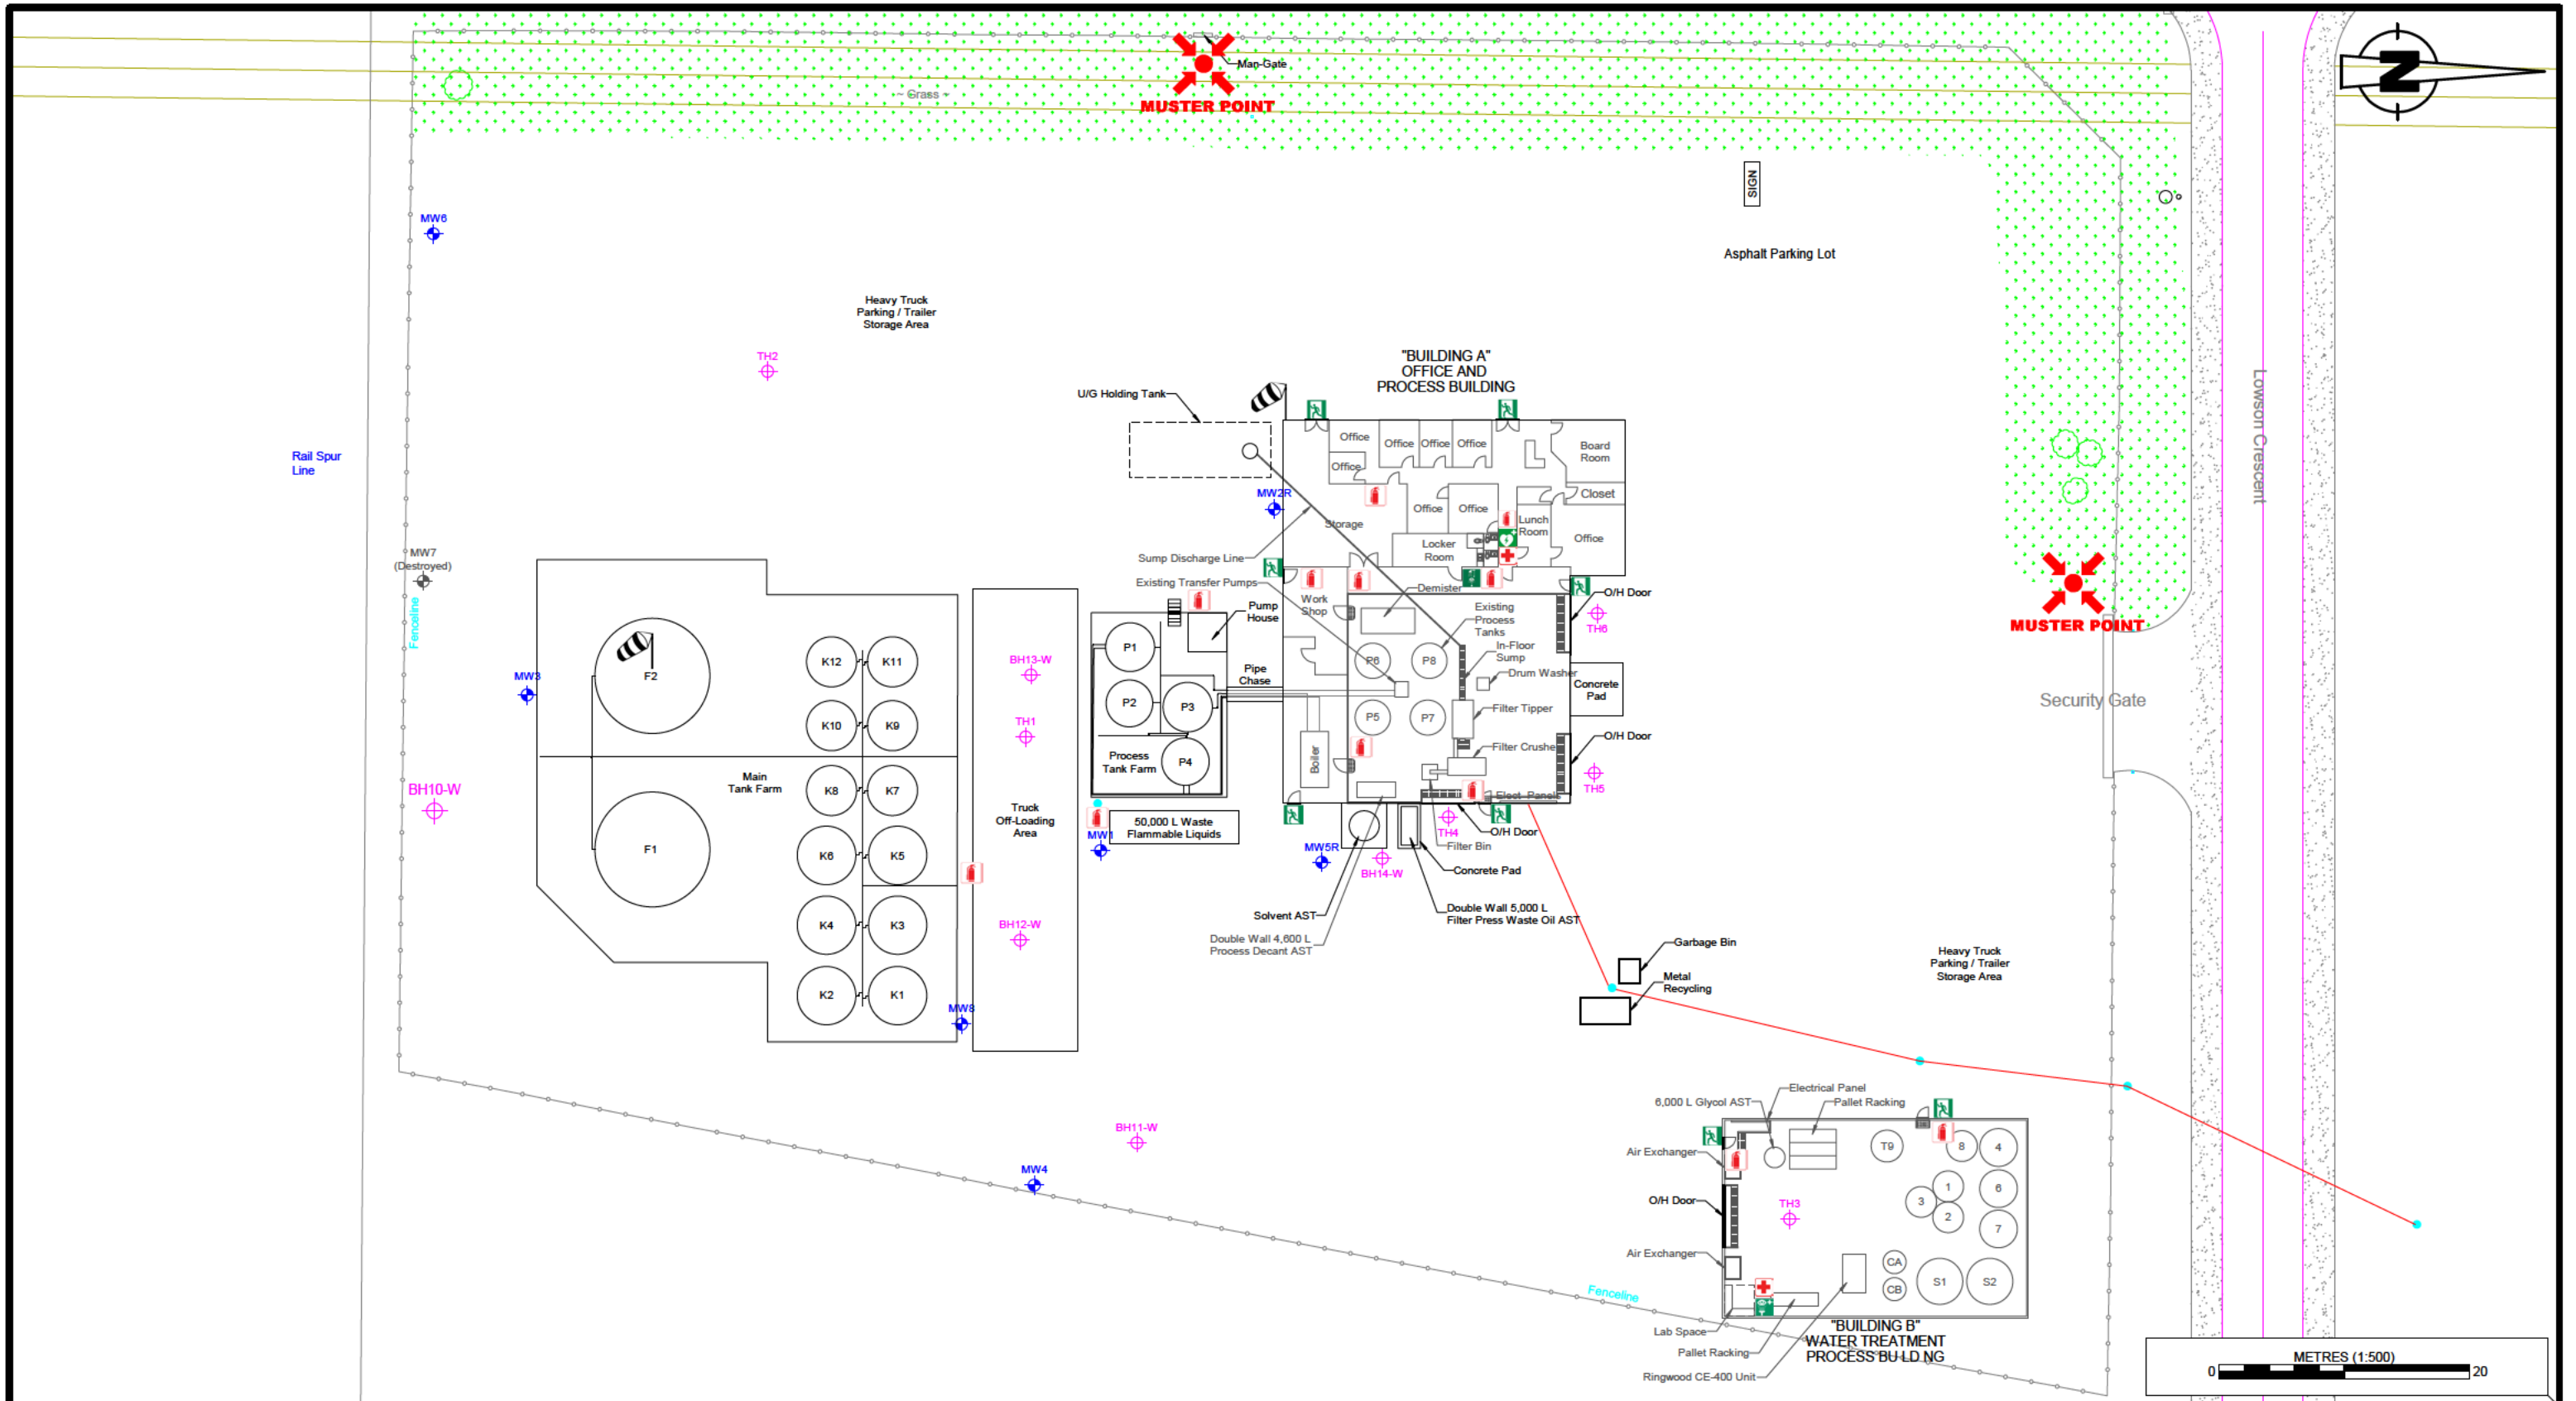

Yours Sincerely,

GFL Environmental Services Inc.

Cameron Prichard
