Hello Cory – as the licence renewal for the facility is not a designated activity, the Agency will not be participating further in the review.

Shauna Sigurdson

Hi Cory. Here are my comments/questions on the above submission:

- This site is in relatively close proximity to a residential area, so I would like to see more information/detail on the following:
 - Mitigation/response measures for a potential fire and/or explosion
 - Why are some tanks not connected to emissions mitigation equipment?

Thanks,

Lisa

Hello Cory,

The OFC recommends that the proponent to:

- Comply with Division B Part 3 of the NFC, and
- Submit Fire Safety Plan (as per NFC Section 2.8) and obtain required permits from the City of Winnipeg.

Regards,

Hi,

The Central Region IRMT does not have any concerns with this proposal that is within the City of Winnipeg.

SUBJECT: Review of DGHTA File No. 4320.1 – GFL Environmental Inc. – 1090 Kenaston Blvd, Winnipeg

The Environmental Compliance and Enforcement Branch of Manitoba Sustainable Development has reviewed the above noted application and would like to provide the following comment:

- The application states on page 4 that the proponent is considering the option of installing a Weima WLK 10 Shredder at the development to process empty jugs and bulk oil pails accepted at the facility. If the proponent should decide to proceed with the processing of plastics on site, the proponent should submit the following information to the department prior to installing and operating a shredder at the development:
 - the manufacturer specifications sheet for the specific unit to be installed at the development;
 - an updated site plan with the proposed location of the shredder; and
 - a noise and dust mitigation plan for the operation of the shredder unit, if required by the department.
