Dear Jason Bunn:

Re: Maxwell Colony Lagoon Relocation - Notice of Alteration Approval

Thank you for your notice of alteration dated March 29, 2022, to change the location of the proposed wastewater treatment lagoon. It will be located on the north side of Provincial Road 424 (Rural Municipality of Cartier) on River Lots 106, 107 and 108, Parish of St. Francois Xavier.

You advised the new lagoon design adds a wetland treatment cell to reduce phosphorus and changes the size of the primary and secondary cells.

Treated effluent from the proposed wetland cell will discharge during the allowable period from June 16 to October 31 of any year. The effluent will discharge into a watercourse connecting Hammercrest Creek and an oxbow. Hammercrest Creek merges with the Assiniboine River via a valve connection. The valve is usually closed for flood control.

I approve this alteration under section 14(2) of The Environment Act. The ongoing assessment process will accommodate the potential environmental effects.

If you have any questions, please contact Barsha Sagan, Acting Senior Environmental Engineer, Environmental Approvals Branch at Barsha.Sagan@gov.mb.ca or 204-795-7175.

Sincerely,

Original Signed by
