This list represents laboratories that have been approved by Manitoba Government to perform soil particle size analysis for the purpose of designing onsite wastewater management systems. This list is not intended to be inclusive as there may be other Certified or Accredited laboratories that are qualified to perform soil particle size analysis in accordance with the required ASTM standards. Please check the yellow pages or internet if you are interested in finding a different laboratory.

Please contact Derek Smith, Onsite Wastewater Management Program Specialist at (204) 794-1176 or by email at derek.smith@gov.mb.ca if you have any questions or wish to be added to this list.
