

Grass RiverProvincial Park

Campground Tips

- Be Wildlife Smart. Do not feed any wildlife, including birds or squirrels. You are in black bear country secure all attractants such as food, cooking equipment and trash in a locked vehicle. Do not store food or attractants in your tent.
- Practice Leave No Trace.
 Pack out all gear and trash to keep the campsites clean for others.
- Keep dogs on leash and clean up after your pet.
- Learn to recognize and avoid poisonous plants such as poison ivy.
- Open fires are prohibited.
 Use portable stoves or fire pits provided.
- Don't Move Firewood -Moving firewood can spread harmful invasive species and destroy our forests.
- Prevent the spread of aquatic invasive species.
 Always clean, drain, dry watercraft and water related equipment. Visit manitoba.ca/stopais for full regulations.
- In case of injury or illness contact a Park Attendant or Park Patrol Officer. They can assist you to reach medical help.
- Full camping regulations are available in the Campers Guide, available from park offices and online at manitobaparks.com.

Iskwasum Landing Campground

The sheltered waters of Iskwasum Lake provide excellent walleye and pike fishing

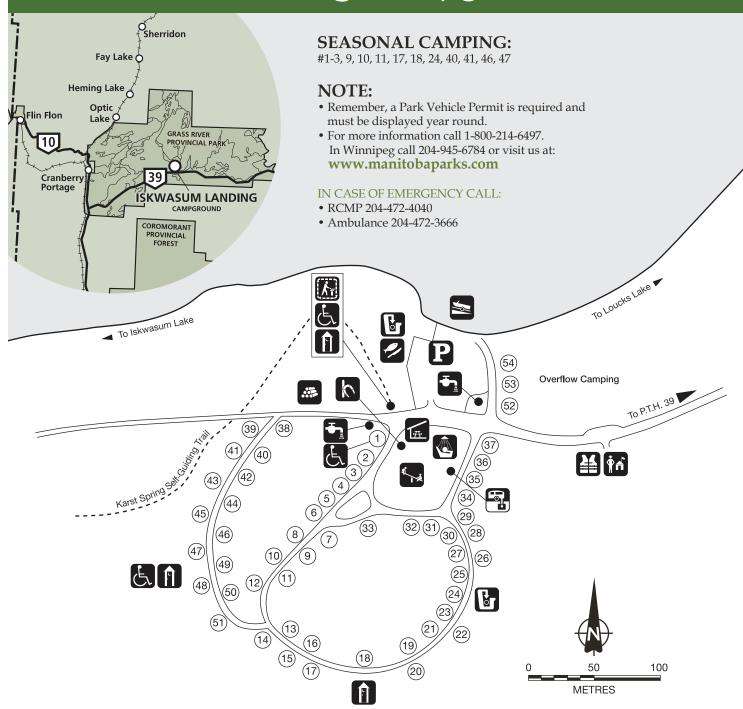

Situated on a widening of the Grass River, Iskwasum allows water access both upstream to Iskwasum Lake and downstream to Louck's Lake and east to Louck's Falls. Iskwasum Lake is dotted with many islands, home to some of the oldest trees in Grass River Provincial Park. It's sheltered water provides excellent walleye and pike fishing. Louck's Lake is also renowned for its fishing.

Campers at Iskwasum enjoy well-treed basic sites, solar powered water treatment, a solar heated gravity flow shower, a playground, horseshoes and an open green space. They also have access to the Karst Spring Self-Guided Trail, a 3.2 kilometre (return) trail leading to a scenic karst spring. Karst Springs is located half-way around the trail. The stream of water surges out of a sedimentary rock cliff of the Manitoba

Lowlands and flows into the Precambrian Shield's Grass River. Interpretive signs along the trail provide additional information about the two vast geological regions of the Manitoba Lowlands and the Precambrian Shield and the spring that joins them. Allow two hours for walking and observation on this moderately strenuous trail.

Since the boreal forest is not homogenous or static, it provides constantly changing habitats or homes for different wildlife species from insects to woodland caribou. Look for red neck grebes in the river, bald eagles and loons on the lakes, and gray jays (whiskeyjacks) in the campground.
